

PRESENTATION  
OF THE ACTIVITY  
**TECHNICAL DUE  
DILIGENCE**

**8.2 France**

In the last few years, **Technical Due Diligence** has taken on key importance in the energy sector. These technical reviews require the implementation of specific skills, enhanced by the commitment of a team that has received optimal preparation in terms of its capacities, know-how and experience. **8.2 France** was founded on the basis of the proven references of its experts, publicly recognized for their professionalism. Be it in the wind turbine or solar power sectors, **8.2 France** performs complete **Technical Due Diligence**, available in a range of versions that are in conformity with your needs.

OPTIMIZED TDD	STANDARD TDD	ACCOMPANIED TDD
Red Flag with generating capacity review	Red Flag with generating capacity review	Red Flag with generating capacity review
Monitoring &/or billing	Full TDD with wind study	Full TDD with wind study
Turbine delivery (EoC audit)	PMA with foundation expertise and site supervision in 5 visits	Review & negotiation of contracts
Funding of wind farms for key accounts well-implemented on the market	Billing follow-up with minimum 9 verifications	PMA with foundation expertise and continuous site supervision
	Turbine delivery (blades on the ground + EoC audit + performance expertise)	Billing follow-up and project piloting
	Provisional delivery of the wind farm and lifting of blocking reservations + release of funds	Delivery of the work with mechanical completion of the wind turbines
	Funding of wind farms for experienced operators with a dedicated organization	Turbine delivery EoC (blades on ground + audit + performance expertise)
		Provisional delivery of wind farm + lifting of blocking reservations + release of funds
		Definitive delivery of the wind farm at 1 year performance analysis + lifting of all reservations
		Funding of farms for investors with no experience and/or designated team

PRESENTATION  
OF THE ACTIVITY  
**TECHNICAL DUE  
DILIGENCE**

**8.2 France**

**THE TEAM**

**Bruno ALLAIN**

After 8 years devoted to the execution of large-scale international projects, Bruno has spent 18 years developing skills in construction, project management, procurement and technical consultancy, essentially in the field of wind farms. Bruno's contribution to Technical Due Diligence lies in his significant experience in CAPEX/OPEX reviews, EPC contracts and project development.

**Bruno HELLEBOID**

Bruno has 27 years' experience in the engineering industry (ground equipment for aircraft) and 8 years in wind turbines. Bruno has a degree in energy control and renewable energies, and is responsible for all the technical aspects to which he can bring his expertise, particularly electricity, assessment of turbines and civil engineering.

**Damien HUCHET**

Damien has 10 years' experience in renewable energies. He is an engineering graduate of INSA Lyon, and was then Project Director for renewable energies for 6 years, before joining 8.2 in 2014. In addition to his skills in improving the performances of wind farms, Damien has specialized in analyzing O&M technical reports, as well as a variety of contracts associated with wind farms.

**Bernard VEREEQUE**

Bernard is a graduate in law, economics and management. He has overall experience of 9 years in the field of wind turbines, in financial and HR posts. He is responsible for administrative and regulatory matters associated with the development of wind turbine or solar energy projects. He is also responsible for billing follow-up during the construction phase.

**Florian BENAS**

Florian has a degree in environmental engineering from Polytech Chambéry. He joined 8.2 France in 2016 and already had 3 years' experience in the wind turbine sector, including 2 with EDF and Enercoop. He assists the Due Diligence team with the regulatory aspects (authorizations, leases, impacts...).

**Antoine ANCELIN**

Antoine is a graduate in geological engineering from LaSalle Beauvais, after a double degree from a business school. He joined 8.2 in 2017 to pilot the commercial activity. He also works on Due Diligence in the geotechnical/ground aspects and CAPEX/OPEX reviews.

These **consulting engineers** can also complete the Due Diligence with **technical audits** carried out on site by our **operational team**, composed of **10 experts**.

In order to respond to the very highest requirements, **8.2 France** provides you with the **recognized skills** of the 8.2 Group's extensive **international network**, composed of **30 independent offices**.

**8.2 France** is capable of **doubling** its **team** if necessary, a possibility made available to you thanks to a partnership established with other **recognized experts**, resulting in rapid and flexible scalability for large project portfolios:

- **Mathieu Sarran** (Venturi Enr)
- **Alexia Chappond** (Cassya)
- **Guillaume Marcenac** (Enercoop)
- **Vincent Gautier** (Elkano Energy Consulting.)
- **Charles Dugué** (8.2 Consulting AG)
- **Mickaël Martin** (4Op)
